

Determina si las razones son proporcionales.

1.
$$\frac{8}{24}$$

1.
$$\frac{8}{24}$$
 2. $\frac{1}{2} = \frac{6}{12}$ **3.** $\frac{2}{6} = \frac{6}{18}$ **4.** $\frac{2}{4} = \frac{4}{8}$

3.
$$\frac{2}{6} = \frac{6}{18}$$

4.
$$\frac{2}{4} = \frac{4}{8}$$

4x24=96

No proporción

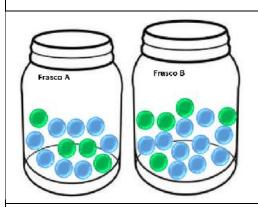

5.
$$\frac{6}{12} = \frac{10}{20}$$
 6. $\frac{1}{5} = \frac{5}{25}$ **7.** $\frac{5}{6} = \frac{20}{24}$ **8.** $\frac{2}{7} = \frac{6}{21}$

6.
$$\frac{1}{5} = \frac{5}{25}$$

7.
$$\frac{5}{6} = \frac{20}{24}$$

8.
$$\frac{2}{7} = \frac{6}{21}$$

Determina si existe proporción entre el contenido de los frascos:

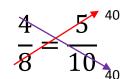

#1 Razón frasco A Razón frasco B

Verde a azules: $\frac{4}{8}$ Verde a azules: $\frac{5}{10}$

#2 (Jtilizando producto cruzado para Verificar si

existe proporción

40 = 40

Hay proporción
